DETAILED ACTION

Allowable Subject Matter

Claims 7, 8, 11-16, 18 and 19 are allowed.

The following is an examiner's statement of reasons for allowance: with respect to claims 11 and 18, Applicants' arguments are persuasive (see pp.7-8). Specifically, the prior art of record neither teaches nor reasonably suggests an apparatus or method that performs the functions of:

a) executing primary pattern matching between the first image information in the first set area and the second image information in the second set area by translating the second set area within the area of the second image information to determine a primary matching area having the second image information most similar to the first image information in the first set area, and

b) executing secondary pattern matching comparing the first image information in the first set area and the second image information in the primary matching area by translating and rotating the second image information in the primary matching area relative to the first image information in the first set area, thereby producing information used for positioning the couch

c) in the combinations as claimed in each of claims 11 and 18.

Claims 7, 8, 12-16 and 19 are allowed by virtue of their dependency.
